WORKING PAPER

Project: _____
Date: 890531
Viewer: 018
Session: 01

SUMMARY OF INFORMATION:

1. (S/NF/SK) The site is a structure/land interface on uneven ground. A road is a prominent feature of the site. There were repeated impressions that the structure is of a complex shape, interlocated with many trees (see sketch, page 6).
2. (S/NF/SK) Dowsing provided 5 separate types of impressions located at various places around the world (see map, page 7A). A forced choice of these sites places the analytical guess as Africa.
